

Jason Boyd Joins Talentscale Team as Senior Aviation Recruiter

LAS VEGAS, NV – August 27, 2020: Talentscale, Inc. announces the addition of Mr. Jason Boyd as a Senior Aviation Recruiter in support of its growing staffing and technical services business lines.

Talentscale is pleased to announce the selection and addition of Jason Boyd as Senior Aviation Recruiter to the Recruiting team. Jason possesses eight years of experience in the Staffing industry as a Recruiter as well as a Team Lead. In addition to his recruiting experience, Jason brings four invaluable years as a Sheetmetal and Final Assembly Mechanic on Boeing 747 and Sikorsky UH-60L/M airframes.

“What sets Talentscale apart from our competition is the fact that the majority of our Business Development and Recruiting professionals are former aircraft maintainers, just like Jason. As such, we speak the language and are intimately familiar with our clients’ requirements with no learning curve. Adding Jason to the team is just one more step we’re taking to continue to grow the Talentscale brand,” explained Aaron Gill, Talentscale’s VP of Aircraft Services & Programs.

In the role of Senior Aviation Recruiter, Jason will be instrumental in supporting the establishment, delivery and ultimate growth of staffing accounts as well as government contracts pursued by Talentscale. He will directly support Talentscale’s Account Managers through the sourcing, vetting, interviewing and selection of qualified candidates to fill client requisitions.

About Talentscale

[Talentscale, Inc.](#) is a Service-Disabled Veteran Owned Small Business (SDVOSB) and Strategic Partner that provides Staff Augmentation Services as well as Engineering and Technical Services to the aviation and aerospace industries in support of aircraft maintenance, modification and manufacturing efforts. Since being founded in 2008, the company’s focus has been on the sourcing and placement of skilled Veterans on a contract, contract to hire, and/or direct hire basis across a wide range of skillsets in support of government and commercial aircraft maintenance, modification and manufacturing programs.
