

Talentscale's Kinetic Technical Services Division Expands Its Leadership Staff with New Director of Operations

Kinetic Technical Services (KTS) announced today plans to expand their executive team by hiring Kirk Czarnecka as Director of Operations. Bringing with him 35+ years' experience in DoD contracting and aviation maintenance management, Czarnecka will lead all business operations functions for Talentscale's government services division, Kinetic Technical Services. In this role, he will be directly responsible for KTS' Program Management Office (PMO), Quality Management System (QMS) and will play a vital role in the business development lifecycle, from capture to proposal to execution.

Doug Poldrugo, Kinetic Technical Services Founder and CEO, expressed his excitement to welcome Czarnecka to the KTS family. "Kirk will be a game-changer for this company and will further transform our vision for KTS to be a major player in the aircraft maintenance and modification support world into a reality," said Poldrugo. "We are extremely lucky and ecstatic to have him aboard to help grow the company."

Prior to joining the KTS team, Czarnecka served as Director of Operations at M2 Services Corporation, managing their aviation maintenance operations business. In this role, he had management responsibility of two AS 9110C/ISO 9001:2015 QMS, was the lead business development and proposal representative and managed the technical/business performance of each contract supporting aviation maintenance operations post award up to \$80M annually. Among his many accomplishments with his previous employer, Czarnecka developed M2's ISO/AS-based Quality Management System (QMS) for the aviation maintenance arm within his first 90 days of employment and reported directly to the Owner/President. Previously, Czarnecka was Director of Field Services at VSE Corporation, where he led the company's Contract Field Teams (CFT) Program Office and supported multiple task orders under Air Force programs that provided labor and logistical services for various military agencies.

Aaron Gill, Kinetic Technical Services VP of Aircraft Services & Programs added that "We are humbled and extremely fortunate to have Kirk aboard as part of the KTS family. His vast knowledge, reputation in industry and work ethic are 100% in line with who we are as a company and where we're headed."

KTS is well on its way to becoming a top-tier aircraft maintenance services support company and a true government contractor. Their highly-skilled leadership team has extensive human capital management, program management, aircraft maintenance/modification and military backgrounds, enabling them to build a reputation for quality, accountability, and execution.
